

ADOT I-19 FRONTAGE ROADS STUDY

What is the I-19 Frontage Road Study?

The I-19 Frontage Road Study will recommend a 10-year program of traffic, safety, and access improvements to the I-19 frontage roads. Specific tasks that will be carried out in the study are:

- Document current traffic conditions (traffic, safety) on frontage roads
- Identify frontage road needs
 - Intersections
 - Continuity
 - Access
 - Road segments
 - Paving
 - Safety
 - Street Maintenance
- Recommend improvements to the frontage roads to address the needs

What are the Study Boundaries?

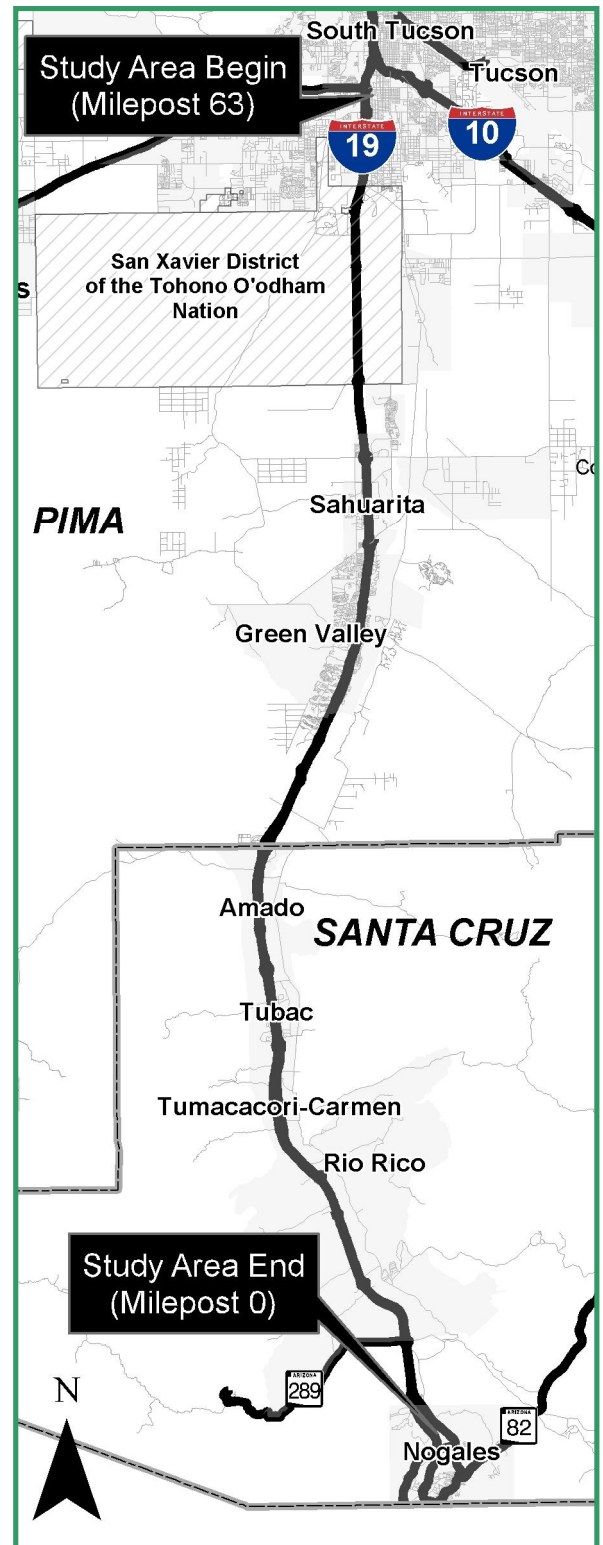

The study boundaries include the I-19 Frontage Roads between I-10 and the US / Mexico Border.

Project Schedule

The project began in late July 2007 and is expected to be completed in July 2008.

How Can I Participate?

Please provide us with your comments on the attached Comment Form.

ADOT I-19 FRONTAGE ROADS STUDY

Comment Form - We want to hear from you!

Thank you for participating in the I-19 Frontage Road Study. Your feedback is important to us. Please write your comments on frontage road needs below, providing as much detail as possible (including location). Please reference your comments (as applicable) using segment numbers as displayed on the attached map. Please attach a second page as necessary.

Completion of the below information is completely voluntary. Provision of this information helps the Project Team to keep an accurate record of meeting attendees. Under state law, any identifying information provided below will become part of the public record and, as such, must be released to any individual upon request.

Yes, please add me to the mailing list for future notification of open houses.
